Product Management Day 1 Notes📌

Day 1: Product Management Fundamentals

---

1. What is a Product?

A product is **anything that solves a real-world problem** for someone.

2. The Four Types of Products

- **Physical Products:** Tangible items *(e.g., a bottle)*

- **Digital Products:** Software/platforms *(e.g., Google Docs)*

- **Service-Based Products:** Service facilitation platforms *(e.g., Zomato)*

- **Experience-Based Products:** Shared real-world experiences *(e.g., Airbnb)*

3. Core Responsibilities & Focus Areas for a Product Manager

1. **Value Proposition:** Ensure the product delivers clear, defined value to users.

2. **Feature Functionality & UX:** Deliver a smooth, simple, and pleasant user experience (crucial for digital products).

3. **Market Positioning:** Position the product effectively to cater to the right target audience *(e.g., iOS vs. Android)*.

4. **Product Life Cycle Management:** Adapt strategies across all 5 stages to keep the product alive and thriving:

5. **Customer Feedback Loop:** Continuously gather and act on customer insights—customers make or break a product.

6. **Business Model Alignment:** Understand how the product generates revenue.

7. **Business Ownership Mindset:** Treat the product as the business itself.
